A little like magic ... a lot like Williams!

In MYSTIC MARATHON, the wizards at Williams bring to the screen magical, whimsical creatures with the charm to attract players of all ages and the cleverness to challenge skill and reflexes.

The scanner displays runner position and island configuration as the player controls the joystick and jump button to compete in a marathon that takes the runners across several mystic isles, each one with its own unique characters and features. The player must finish in the top three to go on to the next race.

Feet-stomping ogres, apple-tossing trees, whirlpools, rock monsters, geysers, sharks, wizards, giant clams, meanie mushrooms, lightning bolts, tomadges, water monsters and rolling stones all suddenly appear and use their special powers to delay the runner from his goal. If the player can collect the crystals, pearls and golden mushrooms for bonus points and wisely use his friends, the helping hands, caves and holes that offer shortcuts, bridges, the butterflies, birds and balloons that fly the player above the hazards, sleeping dragons that act as slides, and leaf boats and sea horses that ride the player over the water, he can make good time in his race. The buy-in option lets the player enter ever more fantastic worlds and meet the ever more imaginative creatures that inhabit them.

MYSTIC MARATHON is available only as a conversion kit and converts all Williams horizontal monitor games—games like Defender, Stargate, Robotron, Joust, Bubbles—quickly and easily. The kit includes a new set of electronics, complete control panel assembly, brilliantly-colored marquee, new CRT glass, and crisp, bright side decals.

To keep the game top-running for all players and all locations, Williams builds in its proven reliability and the most sophisticated game adjustment system in the industry. Detailed bookkeeping information helps operators optimize these game adjustments and a complete series of diagnostic tests check entire electronic systems in a matter of minutes.
